It's Not! But it's Cute!
(Game App)

1. Target audience pre-teens and teens but anyone can play.
2. Open the app. Create an account. Play game.
3. Completed levels will be saved in the app even if you logged off.
4. It can be a standalone app. It's useful for killing time.
5. Some capabilities that I would like to add on are: Multi player, difficulty level, global challenges, create own level, and upload it for other people to play.
